

## **Bogus Self Employment**

Prime Minister Tony Blair referred to the Government's drive against bogus self employment in the construction industry at the TUC Congress in Brighton on Tuesday, 12 September. "We are looking at this now and we will be making certain changes that will be introduced into the Construction Industry Scheme, which should allow us to take care of some of the problems."

He also referred specifically to the issues of exploiting people and health and safety, both in relation to bogus self employment.

UCATT General Secretary, Alan Ritchie, also attacked bogus self employment.
