Introduction

Environtec is one of the UK's leading asbestos training companies with three decades experience in the design and delivery of a wide range of asbestos related training courses. Our highly qualified trainers have a combined experience of in excess of 80 years of working in the asbestos industry and offer a wealth of anecdotal evidence to our delegates.

Environtec is a member of the **United Kingdom Asbestos Training Association** (UKATA) and is certified to deliver Category A and B courses, and a member of the **British Occupational Hygiene Society** (BOHS) and certified to deliver proficiency and occupational hygiene training modules.

Courses can be delivered at Environtec's training facility in Essex or arranged from other regional offices in Nottinghamshire, West Yorkshire, Gateshead, Wales and Scotland. Alternatively, courses can be delivered at customers' premises.

Courses can be delivered either traditionally in classroom environments or virtually on-line in certified eLearning modules.

All delegates successfully completing courses will receive formal training certificates supplied via either UKATA, BOHS or Environtec. Classroom asbestos awareness delegates will also receive credit card sized photo identification cards that delegates can display to offer proof of training for 12 months.

Further information on all our training courses is supplied below, however, you can visit our website or contact us for more information on 01245 381900 or email training@environtec.com.
